FORUM WOOD BUILDING NORDIC 2018 – TOWARDS A NEW RENAISSANCE

Linnaeus University will host the seventh Forum Wood Building Nordic on September 27–28, 2018 in Växjö. The conference is a fantastic opportunity for academics and practitioners to meet and exchange experiences and to learn from the best within the field.

“Forum Wood Building Nordic 2018 – towards a new renaissance” highlights financial and social factors, which contributes to innovative thinking. Industry, production and products are developed as a result of progress within science and practice, as well as through an increased political openness.

Examples of areas that will receive a lot of attention by Nordic and other international speakers this time are:

- The political openness that allows for more wood in construction
- Planning to build with wood
- Large and great timber buildings
- Life cycle analysis for climate-smart sustainable building
- How digitalization can affect daily working life and production efficiency
- Contemporary wooden architecture

Among many high quality speakers, some extra highlights are:

- The building program declaration of the Nordic Council of Ministers.

- Fredrik Lindblad, Linnaeus University/SE, will present how municipalities can consider wood in land allocation activities (marknansvisning) in a legitimate and transparent way.
- Konrad Merz, Merz Kley Partner/AT, looks back at 25 years of experiences in wood constructions in Central Europe.
- Mark Hughes, Aalto University/FI, talks about the effect of interior climate in wooden buildings on humans health and well-being.
- Alar Just and Daniel Brandon, Research Institute of Sweden, bring new findings on fire safety in CLT buildings with exposed wooden surfaces.
- Ola Nylander, Chalmers and CBA/SE, shares his thoughts about whether the design of today’s buildings really is sustainable.
- Lukas Schiffer, TJIKO/DE, presents a new business model about individual standard bathrooms that might revolutionize the way bathrooms are assembled into new apartments.

For exhibitors

Would you like to exhibit during the conference? There are still some stands available in the exhibition hall. Price information and available exhibition places can be found on <http://www.forum-holzbau.com/nordic/index.php>

Registration

You register on <http://www.forum-holzbau.com/nordic/index.php>
